

Acrylic & Polycarbonate Replacement Domes for Skylights

Introducing our **Acrylic and Polycarbonate Replacement Domes for Skylights** – designed to withstand wind, deflect sunlight, and repel rain. This traditional dome skylight boasts a thermoformed bubble structure, enhancing room depth while maximizing light exposure from all angles. Available in single or double dome options for added insulation, and crafted from durable materials like acrylic (plexiglass) or polycarbonate. We can manufacture specialty replacement lenses for most pyramids, trapezoids, tandems, ridges and polygonal!

FEATURES:

- ✓ Acrylic is lightweight and approximately 20x stronger than glass, produced with UV stabilized monomer
- ✓ Impact Modified Acrylic is approximately 100x stronger than glass, produced with UV stabilized monomer
- ✓ Polycarbonate is approximately 200x stronger than glass. It is virtually unbreakable and comes with co-extruded UV cap to protect against sun damage
